

Case study

Client: Milk Product Company

Challenge

- Milk Agent wait time for delivery is not under control
- Quantity mismatch

SOLUTION BENIFITS

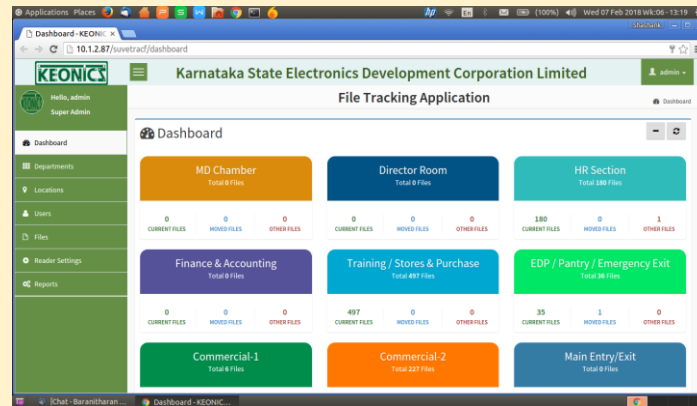

- Reduce paperwork
- Better customer satisfaction with Proof of service Rewards
- Faster and reliable service
- Improves and makes delivery process more effective
- Effective Management
- Speed Control and Minimizes accidents
- Safeguards your reputation
- Reduce time spent at unauthorized location monitoring of your assets
- Deliver right quantity for right vendor at right time

Case study

Client: KEONICS

Challenge:

- Searching & Location Files
- Turnaround time
- Reports

SOLUTION BENIFITS

An RFID based solution for File Tracking

RFID Readers are configured at different locations in the office to track the file movement. A web based solution is provided to know the file movement history & other reports related to file movement, TAT for each file etc..

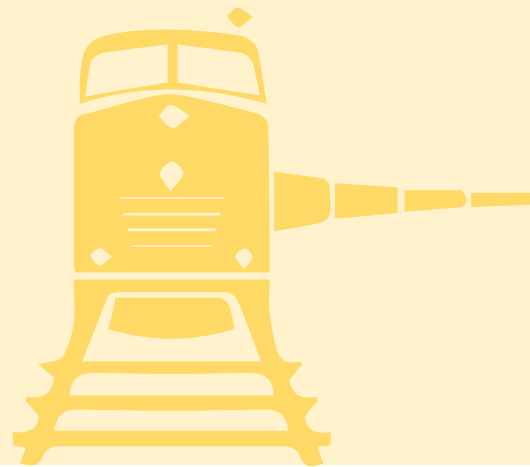

- File tracking is digitized
- Minimized the file find time
- Increased the productivity
- Reduced the Human errors

Case study

Client: Locomotive

Challenge

- The Locomotives carrying the ore & finished products moving at a speed more than the set permissible limit.
- The Locos left idle for long time running multiple engines
- Under Utilization of the engine.

SOLUTION BENEFITS

- Better visibility on the Locomotive
- The Control room knows the real time status of all Locomotives
- Better Speed Control enforcement
- Effective Management
- Huge Savings on Fuel Cost
- Safeguards your reputation
- Reduce time spent at unauthorized location

Case study

Client : Car Dealers

Challenge

- Tracking of Demo Cars
- Tracking of Drivers
- Availability of Demo Cars

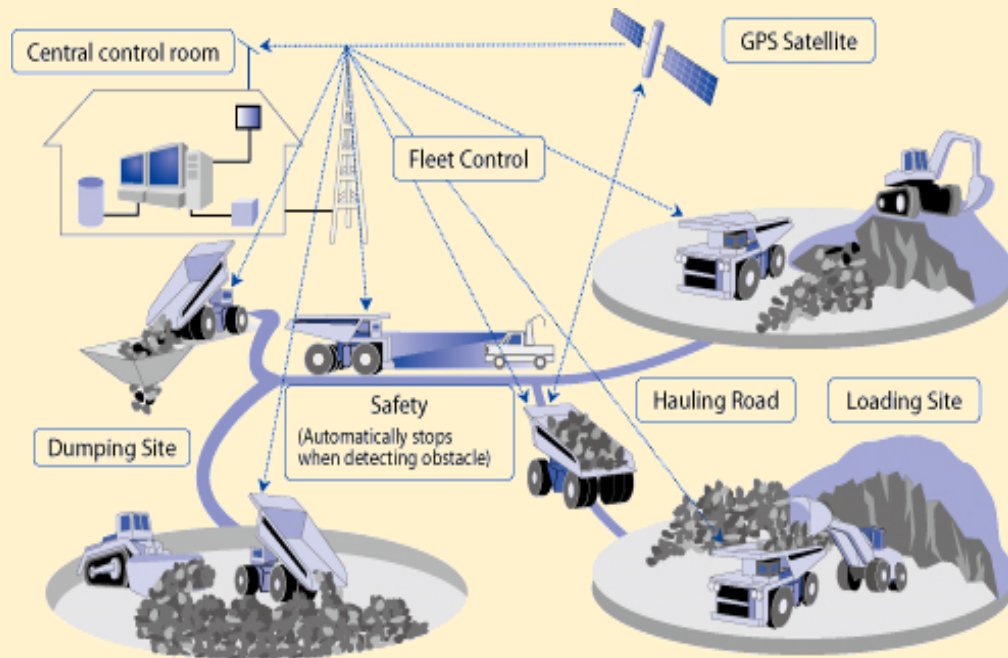

SOLUTION BENIFITS

- Driver Availability and accountability
- Safeguards your reputation and Cars
- Speed information to improve safety
- Better customer satisfaction with Proof of service
- Fuel savings (~40%)
- Faster and reliable service
- Effective Management
- Reduce time spent at unauthorized location
- Increase monitoring of your assets

Case study

Client : Mining company

CHALLENGE

- Process Adherence
- Turnaround time
- Manual work at Multiple points

SOLUTION IN BRIEF

- An RFID based solution is provided to the client.
- Each truck is attached with a RFID tag.
- The reader application is integrated with the SAP application. Relevant screen will be opened at each gate & the current entries can be verified & new entries can be entered.
- **By this solution** the manual verification at each gate/entry point is avoided.
- All the details of each trip is stored in the SAP for later verification.
- The turnaround time was minimized to a grate extent
- The set process can be strictly adhered by all trucks & the drivers

Thank You!
